FINDS EASY SOLUTION

Mr. Weber Tells How to Take Care of School Overflow.

ONE MAN'S OPPOSITION IN WAY

Central High Night House All Surplus McKinley Manual Training School Students Without Interfering with Elected Studies—Supt. Chancellor Still Seeking Way Out.

The trouble which is supposed to face the McKinley Manual Training School admits of an easy solution, according to Gustavus A. Weber, statistical expert of the Bureau of Labor, who has made a special study of school conditions here and abroad.

The solution, he finds, lies in simply transferring 150 Central High School pupils to the Eastern and Western High schools, and this with the spare room already on hand in the Central High School, would accommodate the entire overflow of the McKinley Manual Training School in the Central High School building, without compelling them to take courses of study other than those they have selected.

Dr. Chancellor Still to Make Effort. Although the order has gone forth directing the scattering of the Manual Training School overflow, Dr. Chancellor, superintendent of the public schools, said last night that he would make every effort to find room for one or two classes of the school at the Central High School.

"This state of affairs was foretold by me last year," said Dr. Chancellor, "and I advised the board of education of my views. But this body was helpless in the matter, the funds at its disposal for school purposes and appropriated by Congress being altogether insufficient."

On account of the increased enrollment of the McKinley Manual Training School, Dr. Chancellor notified Principal George E. Myers that the freshmen class of his school would have to be distributed among the three academic high schools of the city, and that the pupils would have to take a course which they have not elected.

Order for Class to Scatter. The letter of Dr. Chancellor to Principal Myers is as follows: "Dear Principal Myers: Your high school building is equipped with 230 seats and desks for pupils. Your enrollment exceeds 600 pupils, and will soon go beyond 700. In view of this extraordinary condition, it seems reasonable for me to advise you as to the first-year classes, of whom there are now 300 applicants.

The school authorities have been endeavoring for weeks to find rooms that might be rented to accommodate the overflow, but such properties cannot be secured in the vicinity. The small addition provided in the act of Congress cannot be secured for a year at least. Even were it completed it would be too small to remedy the situation materially.

I am, therefore, compelled, much to the regret of all concerned, to order you to distribute the applicants among the other high schools and to release as many teachers as you can to assist elsewhere. One year hence all applicants now for entrance to the McKinley will be recognized for advanced standing in your school, and they will pursue studies in accordance with this plan.

The splendid growth of the Business High School prevents continuance of any McKinley classes in that building.

The enrollment in high schools this year is already 500 more than at the same time last year.

Expert Weber Suggests Solution.

Gustavus A. Weber, statistical expert of the Bureau of Labor, who has given the matter some thought, in discussing the situation, said last night: "Dr. W. E. Chancellor has issued an order abolishing the first-year course of the McKinley Manual Training School and requiring the distribution of the pupils among the Eastern, Western, and Central High schools. This means that 325 new pupils who have chosen the manual training course will be deprived of that opportunity and will be compelled to take other courses.

"The reason given is that the accommodations at the McKinley School are insufficient to house the present enrollment. In past years the overflow has been provided for in the Central High School and in the Business High School, but the McKinley School has been enlarged in the McKinley School.

Entire Class Can Be Accommodated.

"For some reasons the principals of these schools seem unwilling to make provision for this overflow this year unless the pupils change their courses and abandon their membership in the McKinley School.

"Mr. Wilson, of the Central High School, according to the statement of a member of the school board, stated that he can take 150 of McKinley's pupils provided they become pupils of Central High School. This offer opens up a simple solution of the problem, which would cause no injury to any one and would enable the wishes of the parents of 325 pupils to be gratified.

"If Central High School has room for 150 additional pupils, as its principal admits, and if Eastern and Central High Schools can accommodate the remaining 175 first-year McKinley pupils, then Central High School can distribute 175 pupils between Eastern and Western High Schools, and thus make room for the entire first-year enrollment of McKinley School, without compelling these pupils to change their courses or their membership in the Manual Training School.

Only Difficulty Wilson's Opposition.

As the courses of study in the Eastern, Western, and Central High Schools are identical, the 175 pupils distributed from Central to these schools would not have to change their courses whatever. The only difficulty in the way of this plan seems to be the unwillingness of Mr. Wilson to accommodate the McKinley School, and thereby to lose some of his pupils. The wishes of the parents of 325 pupils seem to weigh nothing against his personal consideration.

Following is the enrollment of the five high schools according to the latest figures obtainable to-day: Central, 1,245 seats, 854 pupils enrolled; Eastern, 526 seats, 322 pupils enrolled; Western, 497 seats, 439 pupils enrolled; Business, 735 seats, 726 pupils enrolled; McKinley, 230 seats, 602 pupils enrolled.

SUITS AGAINST RAILROADS.

Attorney General Directs Prosecutions for Alleged Violations.

Attorney General Bonaparte has directed the various United States attorneys to institute suits against a large number of railroad companies to recover penalties incurred by them for alleged violations of the safety appliance law.

The Department of Justice is determined upon a rigorous enforcement of this law. The facts upon which these prosecutions are based were reported to the Interstate Commerce Commission by its inspectors of safety appliances.

The violations made the basis of the prosecutions number 257.

BIG APARTMENT HOUSE SALE EQUIPMENT IN BAD CONDITION

Col. Johnson Acquires Title to the Nansmond for \$150,000.

Second Purchase He Has Made Within a Few Weeks—Sale of the Parsons Residence.

The sale of the Nansmond apartment house, at Twenty-second and N streets northwest, to Col. B. E. Johnson, a wealthy lumberman of South Carolina, for \$150,000, was announced yesterday. The deal for the property has been pending several days, questions of title to the property being at issue and not all cleared up until late yesterday afternoon.

The deal for the property was effected through the offices of Early & Lampton and Blundin, O'Brien & Bell, representing the owners of the apartment and Col. Johnson, respectively.

Col. Johnson is reputed to be the largest timber owner in the South, having large lumber interests in South Carolina, Georgia and other States. Recently he bought a handsome home on Columbia Heights and decided to bring some of his investments to Washington, and has been buying good real estate. A few weeks ago he purchased the Nelson apartment house, and has now completed the purchase of the Nansmond.

The latest purchase is a handsome structure built about a year ago by Harry Wardman. It is a four-story building, in the colonial style of architecture, contains thirty-two apartments, and is at the present time occupied by tenants. It was designed by Architect A. H. Beers, and is substantially constructed and well equipped for the purposes for which it is designed.

Col. G. A. Steadman, U. S. A., has purchased the residence formerly owned by Mrs. Mary A. Parsons, at 1208 New Hampshire avenue northwest. The price paid is said to be \$30,000. The house is three stories high, and stands opposite the house which Perry Belmont is erecting at his home. The sale was made through the office of Murray Cobb.

John T. Owen & Son, auctioneers, yesterday sold, at trustees' sale, two lots in Deanwood subdivision, for \$45, to M. E. Browning.

William H. Saxton has taken out a permit for the construction of a two-story frame house on Girard street, near Fourteenth street northwest. A. H. Beers, architect, drew the plans, and Albert I. Teel is the builder. The cost is estimated at \$25,000.

DEFENDS MILK INCREASE.

President Farquhar Says Higher Price Is Necessary.

Speaking from the milk dealers' point of view on the proposed advance in the price of milk, George B. Farquhar, president of the dealers' association, said yesterday:

"Members of the Milk Dealers' Association realize that there is a necessity for an increase in the price of milk to the producers, this being caused by an increase in the price of labor and feed of all kinds. The object of the appointment of our committee of six to confer with a similar committee from the Producers' Association was to arrive at an understanding in regard to the price of milk for the coming winter.

"We all realize that the interests of the producer and the dealer are identical, and we feel that if the price of milk to the farmer in the country is advanced to too high a figure there will be a surplus of milk in the city, followed by a reduction in prices all around. We want a stable price, and we do not wish to fix a price so high as to cause an overproduction of milk in the country and a consequent dropping of the price until it falls so low as to again curtail the supply to the city. Our course, we believe, in securing stability in the production and the price of milk is in the interest not only of the dealer and producer, but the public as well."

Mr. Treanor's New Position.

Mr. P. C. J. Treanor, who for many years occupied the position of superintendent with the firm of Woodward & Lothrop, has announced his connection with S. Kann, Sons & Co. Mr. Treanor reconsidered his intention of removing from Washington, and decided to accept the offer made him to remain here. He entered Monday upon his duties with S. Kann, Sons & Co., but was so overwhelmed with congratulations and good wishes from his friends, who learned of his intention to remain in Washington, that he was scarcely able to do more than make acknowledgment of the good wishes.

The most significant item brought out in the hearing of the Georgetown Gaslight Company yesterday before James G. Payne, auditor for the District Supreme Court, was that the Washington Gaslight Company has sold to the Georgetown company \$30,000 worth of gas at 60 cents per 1,000 cubic feet, while the price to the consumer was 42.5 and 51 per 1,000 cubic feet, according to the prices charged before and after the reduction in price.

This evidence was brought out on the cross-examination of the chief witness of the day, J. E. Bates, expert accountant, engaged by the company to prepare a detailed statement of the company's assets, cost of plant, earnings, and expenses. An effort was made by counsel of the company to qualify this statement, on the ground that it was, so to say, the wholesale price of the product, delivered to the Georgetown company without the cost of distribution. The statement was made, however, and not disputed, that it represented the price of distribution, so far as the selling company was concerned.

Profits for Five Years. The hearing yesterday was a resumption of testimony after an adjournment taken August 6 for the purpose of allowing the company to prepare a statement of its property, expenses, earnings, and cost of plant. At the opening of the hearing the deeds of the property were offered in evidence by R. Ross Perry, counsel for the company, with the statement of cost of plant and earnings and expenses for five years, which appears at the head of this column.

J. E. Bates was then placed on the stand to explain the financial statement, and was cross-examined by E. H. Thomas, representing the District of Columbia, and by Stuart McNamara, representing the United States Government.

At one stage in the cross-examination Mr. Thomas drew from the witness the fact that certain items had been placed in the construction account, not so charged in the company's books because the accountant thought they ought to be so placed. This led to a request on the part of the District's attorney that a specified statement of the District of Columbia, and by Stuart McNamara, representing the United States Government.
